

Bomanite Custom Polishing Systems

PROJECT PROFILE

KANSAS UNIVERSITY SCHOOL OF BUSINESS CAPITOL FEDERAL HALL

PROJECT INFORMATION

The Kansas University School of Business Capitol Federal Hall serves as a destination point for students who are determined to move business forward. From state-of-the-art technology to research labs, this will be a hub for collaboration and innovation.

Bomanite Licensee, [Musselman and Hall Contractors](#) worked closely with the local architecture firm, Gastinger Walker, during the design development phase of the project allowing the project specifications and samples to be fine-tuned, making sure this 166,500 square foot four story facility was at the top of its class. The work completed earned Musselman and Hall the Gold Award for the Best Bomanite Custom Polishing Project at the 2017 Bomanite Conference. The Kansas University School of Business Capitol Federal Hall has 20 classrooms, a 350 set auditorium and nearly two dozen collaborative spaces.

The atrium lobby, common area, and gathering space was completed with the [Bomanite Custom Polishing Renaissance system](#). The large common area in the atrium lobby was designed to be a living room-like "entrepreneurship incubator" with 15,800 square feet of 4" thick integrally colored topping slab. The slab was integrally colored with Bomanite's Coal Gray. The slab was ground to a "salt & pepper" aggregate exposure and polished to a semi-gloss finish. The placement of the topping slab included multiple sets of cast-in-place steps as well as an ADA accessible ramp.

The centerpiece of the project, and building as a whole, is the 24' diameter Jayhawk symbol at the west entry of the atrium lobby. The Jayhawk involved the installation of an intricate zinc inlay with a polishable overlay.
