

Bomanite®

TOPPING SYSTEMS

PROJECT PROFILE

Jackson Park Playground

Micro-Top XT has extraordinary adhesion and ability to withstand prolonged pedestrian and vehicular traffic. In these respects, the material is far superior to conventional cementitious coatings. Micro-Top XT provides a tough, water-retardant coating that substantially reduces water penetration, freeze-thaw scaling and concrete carbonation. It is a "breathable" coating that releases normal entrapped vapor without loosening or blistering.

Bomanite Toppings System: Micro-Top XT

PROJECT STATISTICS

Project Name:
Jackson Park Playground

Location: Broken Arrow, OK

Project Designer:
PDG Incorporated

Main Contractor:
RJC Planning Group

Install Completed: April 2013

Sq. Ft.: 1,228

Bomanite Systems:
Toppings Systems -
Micro-Top XT by Bomanite
Custom Colors

Bomanite Licensed Contractor:
Bomanite of Tulsa
P.O. Box 471189
Tulsa, OK 74147
TEL: 918-744-6272
FAX: 918-744-8470

Bomanite Licensee, Bomanite of Tulsa worked with architects PDG Incorporated to create a unique and one of a kind design for Jackson Park located in Broken Arrow, Oklahoma. Micro-Top XT by Bomanite in several custom colors were chosen to create a vibrant and fun playground. The colorful concrete design blended well with the dynamic aquatic play features of the splash pad and shade shelters. The Jackson Park Splash Pad is the largest in the community and covers approximately 2,200 square feet.

Micro-Top XT by Bomanite is a two-part, polymer-modified cementitious coating consisting of a unique rubber-like polymer liquid and a cement-aggregate blend. It can be applied over almost any clean, sound surface including concrete, cement block, tile, metal and wood in a wide range of colors and graphics. Micro-Top XT has extraordinary adhesion and ability to withstand prolonged pedestrian and vehicular traffic. In these respects, the material is far superior to conventional cementitious coatings. Micro-Top XT provides a tough, water-retardant coating that substantially reduces water penetration, freeze-thaw scaling and concrete carbonation. It is a "breathable" coating that releases normal entrapped vapor without loosening or blistering. Typical uses include concrete exterior restoration, parking structure protection, sidewalk resurfacing, wall refinishing and installation coating, stadium renovation, swimming pool walkways and balcony deck surfacing.

The Bomanite Toppings Systems are applied by specially trained and licensed Bomanite Contractors, ensuring consistent quality in every application. Every Bomanite Licensed Contractor is part of a network of architectural concrete experts – professionals who receive ongoing technical training to ensure that your project is completed on time, on budget, and beyond your expectations. ▶▶▶ Features and Benefits of Bomanite Micro-Top XT

- ▶ Excellent adhesion and weathering resistance
- ▶ Slip resistance underfoot
- ▶ Long wearing under traffic
- ▶ Retards water and salt penetration
- ▶ Resists ultra-violet degradation from longterm exposure to sunlight
- ▶ Environmentally safe (entirely water-based)

NEWS ▶▶▶ PRODUCT FOCUS: Bomanite Toppings Systems - Broadcast Aggregate

Founded in 1964 as Continental Cars, First Texas Honda is a part of family-owned and operated Continental Automotive Group in Austin. In late 2012, First Texas Honda completed a state-of-the-art renovation to the Steck Avenue showroom and is now the largest Honda dealership in the world at over 140,000 square feet.

Bomanite Licensed Contractor, Texas Bomanite worked with project designer Architect's Inc. in the initial design phase in providing several different flooring systems for First Texas Honda, which is the largest Honda dealership in the world at over 140,000 square feet.

Bomanite Aggregate was installed at the front entry with blue aggregate base to correspond with the notable Honda blue. The Bomanite Aggregate System has a short dry time, high durability, and low maintenance; A great solution for a high-traffic entry way.

DID YOU KNOW...?

▶ ...that Bomanite Exposed Aggregate System Sandstone Texture can be designed for highly durable surfaces? Applications such as plazas, shopping centers, schools and exterior walkways—anywhere improved wear resistance for light- to moderate-duty vehicular or foot traffic is necessary is perfect for Bomanite Sandstone. For more information on our Exposed Aggregate Systems, [click here](#).

▶ ...Bomanite Imprint Systems offer versatility unlike pre-cast unit pavers or natural stone? Bomanite Imprinted concrete can be constructed with different textures, colors and patterns. Using several colors and patterns give this pathway an instant designer look. For more information on our Bomanite Imprint Systems [click here](#).

▶ ...a Bomanite Custom Polished Concrete Floors meet all national traction standards? With an average test result greater than .70 (wet) Static Coefficient of Friction, correctly installed Bomanite Polished concrete flooring is very slip resistant in both wet or dry conditions. [Click here](#) to learn more about the Bomanite Custom Polishing Systems.

▶ ...that Bomanite Patene Arctectura is the efficient, affordable way to transform plain, gray concrete into beautiful, artistic spaces? Indoors or outdoors, new construction or retrofit... Patene Arctectura offers the kind of versatility traditional concrete treatments can't match. [Click here](#) for information on our Bomanite Toppings Systems.

▶ ...that Grasscrete can be used for pedestrian access? The Grasscrete system is probably the easiest grass reinforcement system to walk on. The shape of the pocket allows feet to step predominantly on concrete. Voids can be filled with grass or choice of stone, providing an additional solid surface for pedestrian use. To learn more about the Grasscrete, [click here](#).
