

Bomanite Pervious Concrete Systems

PROJECT PROFILE

COVINGTON READINESS CENTER LA ARMY NATIONAL GUARD

PROJECT INFORMATION

The Grasscrete System was selected for the project due to its LEED characteristics. Grasscrete Molded Pulp Formers were utilized for this project providing sustainability with their 100% recycled content and ability to degrade over time into the sub-soils. The selection of a Grasscrete System is one of the easiest ways to achieve LEED points due to the reduction in heat island effect, management of storm water runoff, recycled content used in the application process as well as the concrete and sub-base, the long lifespan and the low maintenance required. Grasscrete Systems are highly sustainable with a very low life-cycle cost and the ability to be completely recycled and used in a future project.

PROJECT DETAILS

LOCATION

Covington, LA

CLIENT

Louisiana Army National Guard

PROJECT DESIGNER

HMS Architects

GENERAL CONTRACTOR

Citadel Builders, LLC

INSTALL COMPLETED

September 2008

SQUARE FEET

14,260

BOMANITE SYSTEMS

Grasscrete - Molded Pulp Former

NAME OF BUSINESS

Parking Lot
