PROJECT PROFILE

PRIVATE RESIDENCE POOL DECK – INVER GROVE HEIGHTS, MN

PROJECT INFORMATION

PROJECT SPECIFICATIONS/INFORMATION

Description:

Bulach Custom Rock worked with the owners to choose the best finish for their pool deck and backyard patio area. The residential project consisted of a pool deck, gazebo pad multiple patio areas and a large set of steps formed in the hill, with a slight curve leading down to the pool deck that received a bull nose finish.

Over 2,400 square feet of Sand and Desert Tan Bomanite Color Hardener and a Bomacron Slate Texture were installed to provide durability, excellent wear resistance and fade resistance. Bomanite Color Hardener is the most effective coloring method to achieve your desired results in the installation of Bomanite and Bomacron Imprinted concrete surfaces.
