PROJECT PROFILE

DOWNTOWN MARRIOTT HOTEL – RENOVATIONS

PROJECT INFORMATION

The exterior improvements package recently completed at the Downtown Marriott involved an extensive renovation of the hotel's entrance and façade. Hotel guests will undoubtedly enjoy the beautiful new finishes as they approach the front entrance. Bomanite Licensee, Musselman & Hall Contractors was responsible for the architectural hardscapes as well as the improvements in the public right-of-way. The scope of work included, in part, the placement of nearly 16,000 SF of integrally colored Bomanite Sandstone Texture sidewalk and paving, and 2,500 SF of Bomanite Revealed sidewalk and paving at the main entrance.

Prior to the start of the project, during the mock-up process, Musselman & Hall Contractors worked closely with Joe Mika of 360 Architecture and hotel management to craft the right combination of colors, aggregates, and finishes to be implemented in the project. After multiple meetings and sample reviews, Musselman & Hall created the perfect hardscape finishes to blend seamlessly with the other beautiful finishes associated with the project.

Like most projects which involve major renovations to fully functioning facilities, the Downtown Marriott renovation project presented unique challenges. In order to maintain the hotel's operations, the work had to be phased in such a way that guests could still get in and out of the hotel with limited disruption. Constant coordination and communication was necessary between all team members to complete the work in a timely manner and to the satisfaction of the owner.
