

Bomanite Exposed Aggregate Systems

PROJECT PROFILE

WILLIAMS VILLAGE AT THE UNIVERSITY OF COLORADO

PROJECT INFORMATION

PROJECT SPECIFICATIONS/INFORMATION

Project Description: This new student housing development on the University of Colorado's campus, called Williams Village, wanted to feature high end paving at the entry, the walks, and perimeter of the building. The Landscape Architect designed the Bomanite SandScape paving with decorative sawcuts, V-cuts and embedded Lithocrete glass to create a "stream" leading people through the space. To add accent areas and highlight the SandScape, the design called for broom finished Integral Colored bands throughout. The free-flowing design and high-end finishes make this a unique and beautiful project. The design compliments the natural surroundings of the City of Boulder and the finishes add subtle elegance to this new development. Colorado Hardscapes worked under Christopher Concrete for this project, when Christopher saw the decorative paving and knew they could not install it per the required standards he called Colorado Hardscapes.

PROJECT DETAILS

LOCATION

Boulder, CO

PROJECT DESIGNER

BHA Design Incorporated

GENERAL CONTRACTOR

Whiting Turner Construction and Christopher Concrete

INSTALL COMPLETED

July 2011

SQUARE FEET

10,500

BOMANITE SYSTEMS

Exposed Aggregate - SandScape® Texture
