

## PROJECT PROFILE

### STAPLETON REDEVELOPMENT

#### PROJECT INFORMATION

---

#### PROJECT SPECIFICATIONS/INFORMATION

---

Client Need: Concrete paving is very prominent on this project, and the designers needed to be sure that the finished product met all of their specifications for the high profile center of the Stapleton Redevelopment. The hardscapes needed to integrate with real stone in the city center and lend consistency and beauty to the rest of the walkways, patios and plazas along the street. Solution: Bomanite Franchise Partner, Colorado Hardscapes, Inc. walked the property and worked closely with designers to determine their needs. With the SandScape Texture® by Bomanite system and the superior craftsmanship of CHI, the team was able to install the job to the quality necessary of the project. Results: Colorado Hardscapes worked with both Mortenson and Saunders on different sections around the Stapleton Town Center, including paving for patios and sidewalks along 29th Ave. Black banding and special "V" saw-cuts distinguish special areas along 29th Ave. Near the water features at the town center real stones were integrated into the SandScape Texture around the perimeter. The Visitors Center features a multi-colored Bomanite Micro-Top interior floor.

#### PROJECT DETAILS

---

##### LOCATION

Denver, CO

##### PROJECT DESIGNER

Artscapes

##### GENERAL CONTRACTOR

Mortenson and Saunders Construction

##### INSTALL COMPLETED

February 2004
