PROJECT PROFILE

THE SPIRE

PROJECT INFORMATION

Spire Lofts combine modern design with LEED certified elements that provide style and eco-friendly residences. Amenities include multiple swimming pools, a multi-media theater and elevated dog park, ground level retail, restaurants and coffee shops.

Client Need: The Spire, a 42-story glass residential tower in the heart of downtown Denver, wanted to upgrade its 9th floor public space, patio, and amenities deck. They were looking for an updated and inviting statement. While looking at the paving options at the Colorado Hardscapes Concrete Design Center, the owners came across a sample that was just what they were looking for.

Solution: For the bulk of the paving, 11,000 sq. ft. of patios and public space, they chose a Sandstone integral color broom finish. This offered the inviting element they were looking for.

Results: The 700 sq. ft. amenities deck took on a more eclectic and upbeat look with a Bright White Bomanite Revealed base embedded with white and crystal rock. A floating walkway, comprised of sixty-five 2' x 2' stepping stones, completed the new look.
