

Bomanite Custom Polishing Systems

PROJECT PROFILE

COMPASS CHRISTIAN CHURCH – COMPASS CENTER

PROJECT INFORMATION

PROJECT SPECIFICATIONS/INFORMATION

Project Description: In its natural state, concrete is subject to staining and dusting, doesn't wear well aesthetically and is difficult to clean. Being a heavily-trafficked church, Compass Christian Church needed an attractive, long-lasting and cost-effective concrete flooring solution for their new Compass Center facility. That's why ICI Construction called on Bomanite Licensee, Texas Bomanite, to transform an old Food Lion grocery store floor into the beautiful floor that the congregation enjoys today. The remodeling process began with over 6,800 SF of existing topping removal and extensive patchwork. Then, using the Bomanite Custom Polishing System, Texas Bomanite provided 16,135 SF of polished and dyed concrete with a 1500 grit finish. Texas Bomanite also created custom scored logos throughout the campus for added style and effect. "The opening of the Compass Center has provided us with a physical space for students to call "home," said Shawn Maurer, Middle School Pastor. "We hope to provide a safe place where students truly matter and can feel like they belong, a place where their questions and opinions are taken seriously, and a place where they have the freedom to be themselves."
