

## Bomanite Custom Polishing Systems

### PROJECT PROFILE

#### FRESNO POLICE DEPARTMENT – REGIONAL TRAINING CENTER

### PROJECT INFORMATION

The Fresno Police Department Regional Training Center is a 96-acre state-of-the-art training facility that will serve the City of Fresno for years to come. A 20,000 sq. ft. range house anchors one end of the site. This structure includes a warehouse, administration, gun repository, classrooms, simulators and toilet rooms. Nine rifle ranges are included on the site: seven 50-yard, one 100-yard and one 200-yard range with sniper towers. Located adjacent to the ranges is a 3,000 sq. ft. SIMS tower. The facility has numerous vehicle training areas, including a driver awareness pad, skid pad, urban chase and pursuit courses and a tactical village. On the opposite end of the site are a gym, administration building, additional classrooms and vehicle storage and maintenance structure. This project was designed to meet the current "Fresno Green" requirements for new construction.

Bomanite Licensee, Heritage Bomanite brought to life SIM Architects angular floor design with extensive sawcutting and color combinations. Heritage Bomanite used two colors in the field areas and left some areas uncolored natural gray with the complete floor being polished with the Bomanite Custom Polishing System. The Fresno Police Department logo area used Bomanite Concrete Dye - Black Orchid then a 6' diameter stencil was placed over the dyed polished concrete and the logo was etched using gelled acid. Bomanite Custom Polishing Systems offer many environmentally friendly features, visit the website at [www.bomanite.com/polishing](http://www.bomanite.com/polishing) to learn more about LEED point elements and Green Benefits.
