

Bomanite Custom Polishing Systems

PROJECT PROFILE

REDSTONE AMERICAN GRILL (MODENA SL)

PROJECT INFORMATION

PROJECT SPECIFICATIONS/INFORMATION

Project Description: If you are looking for a floor finish that is low-maintenance, holds up to heavy traffic then Bomanite Custom Polishing Systems is the floor finishing option for you. Available in finishes from satin to gloss, Bomanite Custom Polishing Systems offer exceptional resistance to slipping, abrasion and impact, are environmentally friendly and easy to clean! Bomanite's family of restoration products makes old surfaces better than new. Used on top of high-strength, polymer-modified cement, Modena by Bomanite transforms worn surfaces into beautiful walkways, courtyards and lobbies. The Redstone American Grill is a spirited, rugged and romantic dining establishment that features a wood burning grill, rotisserie and open exhibition kitchen. Upon entering Redstone you are greeted with a large stone fireplace that provides an inviting and warm interior. The custom polished concrete entryway complements and enhances the atmosphere of the restaurant. Bomanite Licensed Contractor, Beyond Concrete provided a much needed update with polished concrete floors. Looking to combat wear and tear to add service life to their floor, reduce costly maintenance and create a custom designed surface to complement the decor, the Bomanite Custom Polishing System Modena SL was the answer. Bomanite's premium Black Integral Color was used to achieve the warm and inviting look and to give it a rustic feel granite aggregates in a blend of black, white and red were put into the mix to provide that distinctive decorative effect.
