

Bomanite Pervious Concrete Systems

PROJECT PROFILE

HAMILTON POOL PARK SERVICE ROAD

PROJECT INFORMATION

PROJECT SPECIFICATIONS/INFORMATION

Description: Bomanite Grasscrete Systems provide a variety of landscape solutions while maintaining a sustainable, "Green" product design. As a cast-in-place, monolithic, pervious concrete pavement that is continuously reinforced to provide superior structural integrity, Grasscrete offers the ability to provide year-round access to a variety of applications without compromising surrounding aesthetics or environment.

Bomanite Licensed Contractor, Bomanite of Austin, installed Grasscrete for a much needed upgraded emergency vehicle access lane for Travis County's Hamilton Park. Hamilton Park receives 75,000 visitors a year and the service road needs to be accessible during all times of the year. The Hamilton Pool Preserve is a historic swimming hole which was designated a preserve by the Travis County Commissioner's Court in 1990. Located 3/4 mile upstream from its confluence with the Pedernales River, Hamilton Creek spills out over limestone outcroppings to create a 50 foot waterfall as it plunges into the head of a steep box canyon. The waterfall never completely dries up, but in dry times it does slow to a trickle. However, the pool's water level stays pretty constant, even during periods of drought. Due to the nature of the the pool trail, it's 1/4 mile in length and includes a series of rock steps descending into the canyon, there are times when immediate access is needed.

Grasscrete offers the ability to provide year-round access for a variety of applications requiring structural paving surfaces without compromising the aesthetics of the exterior landscaping. Grasscrete is a very sustainable product that can employ a large recycled material content both in the form of aggregate and binder such as fly ash or slag—its lifespan is indefinite and can be recycled itself to form the aggregates for future Grasscrete applications; providing Specifiers with a truly sustainable, eco-friendly system to accommodate a variety of needs.

Bomanite of Austin offers a variety of decorative concrete products and systems, and is dedicated to the highest standards of quality and service. Offering everything from imprinted concrete, exposed aggregate and sustainable Grasscrete Systems, Bomanite of Austin has the architectural concrete solution for you. For more information on this project or other questions, contact Bomanite of Austin at 512-491-0202 .
