

Bomanite Custom Polishing Systems

PROJECT PROFILE

THE RICHARDS GROUP – CORPORATE BUILDING

PROJECT INFORMATION

For over 30 years, The Richards Group has produced award-winning advertising campaigns for some of the most recognizable brands in the world. Earlier this year, the advertising giant and its staff of 670 moved into the new The Richards Group building near downtown Dallas. Initially Bomanite Licensee, Texas Bomanite was called in to polish only the concrete lobby floor, however, after seeing the finished product, the owner decided to incorporate the polished concrete into the common areas on all floors. This substantially increased the scope of the work, as it added 8 additional floors to the workload. The project was well underway at the time of this decision, so Texas Bomanite agreed to build the work in 2 phases so that the General Contractor's established schedule could remain intact. This sequencing also allowed for minimal disruption of our other projects. This phasing required Texas Bomanite to do the first part of the work prior to the installation of the exterior curtain wall and since we were working on floors 11-18, it made for some very exciting views! In total, over 70,405 SF of floors were polished to a 1500 grit finish with salt and pepper aggregate exposure. The entire project took 6,000+ man hours. Texas Bomanite was so grateful to work with General Contractors, Manhattan Construction Company on this project. They were extremely accommodating which resulted in a near flawless floor that was finished under budget. The architects on this project were Perkins + Will, with the additional help of The Richards Group owner and founder, Stan Richards.
