

Bomanite Toppings Systems

PROJECT PROFILE

CUPS YOGURT

PROJECT INFORMATION

Cups, a self-serve yogurt store chose Bomanite Micro-Top for its ability to provide custom colors and graphics that matched the cool vibe of the store. Bomanite Licensee, [Beyond Concrete](#), had to first remove the extensive existing glue and surface and do some much needed crack patching. Once the Bomanite Micro-Top overlay was in place Bomanite Hydrocoat sealer and Bomanite Interior Floor Finish were applied to provide the low-maintenance and protection needed for the day to day foot traffic.

Micro-Top by Bomanite is a cutting-edge technology, that uses a paper-thin concrete medium, that provides a coloration system like no other. Utilizing a troweled-on cementitious topping that tenaciously bonds to virtually any substrate, including concrete, wood, metal, plastic or asphalt, Micro-Top succeeds where other coloring methods have failed. Micro-Top provides a canvas where works of art are graphically produced, utilizing custom logos, unlimited graphics, swirls of color or marbled hues to reach the perfect color combination.

Micro-Top can transform damaged concrete or an expanse of plain, gray concrete into a distinctive and dynamic area, bringing bold colors and designs where they've never been before. Micro-Top is an ideal replacement for carpeting or laminate flooring-no costly blasting is necessary before application-resulting in significant savings of time and money and making it perfect for that retail makeover.
