

Bomanite Toppings Systems

PROJECT PROFILE

MELLOW MUSHROOM RESTAURANT

PROJECT INFORMATION

Mellow Mushroom pizzerias began in 1974 in Atlanta, Georgia, featuring their signature hippy-inspired décor, pizza crust made with spring water and offerings for people with all types of dietary restrictions such as gluten-free, vegan and vegetarian. Mellow Mushroom has since expanded across the south and one of the newest stores has recently been completed in Round Rock, Texas.

Each franchise features a different theme for each of its venues. Architects, Oxley Williams Tharp have worked with Mellow Mushroom for years, around the country, to provide a unique dining experience where each individual franchisee's personality is represented in the design. From rotating cows, to airstream trailers, they work with the artists to generate an environment that is both dynamic, fun and truly unique.

Led by general contractors JJO Construction out of Ohio, [Texas Bomanite](#) was called on to add to the unique "vibe" of the chain by bedecking the expansive patio encompassing the restaurant. The 1,035 SF patio was created with a Bomanite Micro-Top XT grey base, stained with Bomanite Chemical Stain Auburn and sealed with Bomanite HydroLock. The Auburn concrete stain color contributes to the warm and laid-back ambience of the patio to encourage diners to come and stay awhile.
