

Bomanite Exposed Aggregate

PROJECT PROFILE

HARRISBURG HIGH SCHOOL MASCOT LOGO

PROJECT INFORMATION

Bomanite Licensee, [Musselman & Hall Contractors](#) worked with Kerkhover Studio Architects to develop a custom mascot logo for Harrisburg High School located in Harrisburg, IL. The original design called for a purple Integrally colored band with stamped letters to read "Harrisburg Bulldogs" surrounding an inner circle of stamped concrete in a brick pattern. Several contractors provided pricing but could not provide acceptable proof of previous similar work experience, thus Musselman & Hall was contacted for their extensive work and ability to provide samples of design ideas and installed projects to show them. After the initial phone conversation with the project manager, Musselman & Hall set up a meeting with the team to review the original design and provide some new exciting modern options. The team was so excited with the new options they chose to go with a [Bomanite Exposed Aggregate Alloy System](#) that involved a custom Harrisburg Mascot Purple Color Hardener and engraving of the text and mascot at the center. The Team loved the design and the sparkle. Bomanite Alloy is an architectural exposed concrete with varying exposure depths using non-native quartz and decorative aggregates that are surface seeded on concrete. Due to the use of Bomanite Color Hardener, Bomanite Alloy is well known for its highly durable surface. Bomanite Alloy also provides increased surface and slip resistance. Bomanite Alloy is suited for exterior applications— anywhere that improved wear resistance for light- to moderate-duty vehicular or foot traffic combined with an architectural finish is necessary, which makes it perfect for the exterior walkway of the Harrisburg High School. The final product is a unique alternate to other decorative concrete finishes that the school staff and students will enjoy for many years to come.

PROJECT DETAILS

LOCATION

Harrisburg, IL

CLIENT

Harrisburg High School

PROJECT DESIGNER

Kerkhover Studio Architects

INSTALL COMPLETED

July 2018

SQUARE FEET

20' Diameter - 314 Square Feet
