PROJECT PROFILE

CLOVIS COMMUNITY MEDICAL CANCER INSTITUTE WATER FOUNTAIN

PROJECT INFORMATION

The Clovis Community Medical Center has a newly built Cancer Institute. California's Central Valley cancer patients no longer need to travel across the state to receive optimal care. The quality of care offered at the \$68 million Community Medical Cancer Institute is superior to any other center currently offered in the state of California and rivals prestigious cancer treatment facilities on the East Coast, according to Dr. Kenneth Forster, the Chief of Medical Physics for Community Medical Center. What makes the [Clovis Cancer Institute](#) remarkable is its high-tech and patient-centric upgrades. State of the art PET/CT machines, rare hi-tech MRI machine which is 1 of 6 in total throughout the United States that caters to the claustrophobic patient, Cyberknife and Varian TrueBeam technology for precise treatment with less side effects can be found at this cutting edge facility. The Clovis Community Medical Center strived to make the patients treatments as comfortable and convenient as possible. The overall aesthetics of the building inside and out make a difference. On a clear day, patients visiting the infusion center can see the beautiful Sierra Mountains along with a view of the Cancer Institutes desert landscaping on outdoor balconies and the base of the building. Colored decorative concrete walkways, outdoor dining areas, mood lighting, green space and a soothing water feature complete the layout. [Heritage Bomanite](#) had the pleasure of being involved in creating elements of the landscape designed by [Terry Broussard & Associates](#). Working with Vineyard Pools, Heritage Bomanite built the water fountain by forming all the walls, sourcing the hard to locate epoxy coated rebar and poured the Bomanite integrally colored concrete. Bomanite Integral Colors consist of colored admixtures and are developed for use in ready-mixed concrete or cementitious toppings. Color added into the mix (white or gray-based cement) is uniform throughout the depth of the concrete, producing durability and longevity of color as the concrete wears the color remains. The product is made of the highest quality pigments, as well as other ingredients designed to enhance the color and improve the pigment dispersion, workability and finishing performance of the concrete. [Bomanite Integral Colors](#) can be used with the installation of Bomanite and Bomacron cast-in-place colored, textured and imprinted concrete paving and flooring or utilized for other colored concrete flatwork applications (trowel finishes, salt finishes, broom finishes, rotary finishes), as well as vertical surfaces and other types of architectural concrete. The Bomanite Coloration Systems finish for the fountain was smooth troweled. The brass letters surrounding the top of the fountain remind everyone that Every Moment Matters. AWARDS: Heritage Bomanite was awarded the 2018 Best Bomanite Specialty Project Gold Award for their purposeful work on the Clovis Cancer Institute Water Fountain.

PROJECT DETAILS

LOCATION

Clovis, CA

CLIENT

Clovis Community Medical Center

PROJECT DESIGNER

Terry Broussard

GENERAL CONTRACTOR

Quiring / Vineyard Pools

INSTALL COMPLETED

April 2018

SQUARE FEET

210
