

Bomanite Toppings Systems

PROJECT PROFILE

ESSEX COUNTY ESTATE GARAGE

PROJECT INFORMATION

The owners of this grand estate in Essex County, Massachusetts installed several Bomanite systems throughout their property. The estate contains an indoor swimming pool, BBQ house, several patios and courtyards, a Barn and two garages, plus a full indoor basketball court that doubles as a Hockey Rink.

Bomanite Licensee, [Premier Concrete Construction, LLC](#) was contacted by the owner to provide a solution to a badly poured concrete garage foundation. Premier Concrete Construction remedied the garage issue, and then installed the Bomanite Broadcast Flake Toppings System in a salt and pepper finish for two separate garage units combining a total of approx. 2,700 sq. ft.

The homeowner wanted a durable flooring surface for luxury as well as off-road vehicles. [Bomanite Broadcast Flake](#) floors are multi-colored flakes encapsulated in high performance, two-component primer, body and top coats that give an architectural design and at the same time create a protective flooring system for long term use wear and tear. The Bomanite Broadcast Flake System utilizes Bomanite Florspartic 100 to create a highly durable, low maintenance surface and provides superior chemical resistance including gasoline, oil and de-icing salts.

The Bomanite Broadcast Flake System contains zero VOC's and is a fast track flooring system that can be applied over prepared concrete and suitable cementitious toppings to form a seamless surface ideal for residential and light commercial applications such as garage floors, basements, indoor recreational facilities, schools and light manufacturing.

Various graphic designs or patterns, such as logos, family crests, homeowners' initials, favorite sporting team emblems may be incorporated into a Bomanite Broadcast Flake System. Flake color blends are available in several sizes and custom flake colors such as metallic and fluorescent shades, glow in the dark and silver sparkle deliver unlimited creativity.

Premier Concrete Construction received Silver Awards for both the Best Bomanite Grasscrete Project and Best Bomanite Toppings Project.
