

Bomanite Exposed Aggregate Systems

PROJECT PROFILE

VALLEY CHILDREN'S HOSPITAL

PROJECT INFORMATION

Valley Children's Healthcare began as the vision of five civic-minded women who saw the need for a dedicated pediatric hospital in Central California. For nearly 70 years, [Valley Children's Healthcare](#) has grown from a 42-bed hospital in 1952 to a 358-bed, nationally respected pediatric healthcare network today with more than 640 physicians and 3,500 staff. Valley Children's delivers high-quality, comprehensive care to more than 1.3 million children in a 12-county service area and has been recognized four years in a row by U.S. News and World Report as one of the "Best Children's Hospitals" in the nation for various specialties. Valley Children's is the first children's hospital west of the Rockies to receive Magnet Nursing designation, the highest nursing benchmark in the world.

As the Valley Children's Healthcare network continues to grow and expand they recently implemented their landscaping Master Plan Phase 2 at the Valley Children's Hospital location in Madera, California to accommodate gatherings, family events and fund raising efforts. Taking advantage of the beautiful California weather for more outdoor events, their south side building landscaping needed improvements for vehicle access for caterers, food trucks as well as emergency, freight and maintenance vehicles.

Working with [Heritage Bomanite](#), the California Central Valley Bomanite Decorative Concrete Contractor, a design was put in place to accommodate the vehicle and pedestrian traffic. Dedicated to providing a top-notch installation for a top-rated children's hospital was a common goal of all trades during the installation. With a strong presence in the Central Valley, the values of Valley Children's call for a set of shared standards driven by excellence, compassion, heart, care for all, and integrity.

The Bomanite Exposed Aggregate System exterior concrete hardscape stands up to the test of time with a history in strength, durability and adds multiple design aesthetics to collaborate with plantings, shrubs and structures. Bomanite SandScape Texture and Bomanite Revealed were chosen based on a previous specification in place for Valley Children's smaller satellite hospitals north and south of the central valley location that were also installed by Heritage Bomanite. With its proven performance and keeping within the color theme, 21,082 Square feet of Seal Gray Bomanite SandScape Texture and 5,899 Square feet of Bomanite Revealed with Light and Dark Blue Glass, Black Granite Aggregate and Bomanite Seal Gray Integral Color were incorporated into a new sidewalk/accessible driveway and patio entrance along with 5,555 square feet of decorative sawcuts delivering necessary control joints with designer appeal.

Heritage Bomanite installed the Pergola Amphitheater with stadium seating that will host many concerts for the children and their families. Over 13,000 square feet of natural gray broom finished concrete can be found in exterior walkways surrounding the amphitheater and the low-maintenance freshly landscaped planter and flower beds by [Landscape Development Inc.](#) Working with an event deadline, the newly finished landscape created a perfect background for the 23rd Annual Harvest Ball, a Signature Event of Valley Children's. This elegant gala has grown to host more than 900 of the community's most generous philanthropists each year and celebrates the life-saving mission of Valley Children's.

Used in combination with a variety of color and staining options, [Bomanite SandScape Texture](#) creates consistent texture and durable hardscapes. Natural stone such as granite, quartz or marble along with unique aggregates such as recycled glass or porcelain are common aggregates of choice for [Bomanite Revealed](#) installations. The natural non-skid properties and abrasion resistant aggregates make both Bomanite Revealed and Bomanite SandScape Texture the perfect choice for entries, municipal or public works projects, hospitals, educational facilities, museums, pool decks, plazas and more. The Bomanite Decorative Concrete Exposed Aggregate Systems offer a variety of modernized mixes and an unlimited palette of colors, textures and aggregate options to choose from, providing cost-effective solutions that are more durable than ever and reveal just how brilliant concrete can be while delivering that little bit of sparkle to any festivity.

Jose Campos, Field Engineer for [Quiring General](#), the GC for this project had this to say about Heritage Bomanite's workmanship "On behalf of Quiring General, we would like to thank Heritage Bomanite for their outstanding contribution to the Valley Children's Healthcare Landscape Master Plan Phase II project in Madera, CA. We appreciate your team's persistence, commitment, and focus to help deliver a high-quality project on schedule and within the client's budget."

Heritage Bomanite exemplified Valley Children's values of excellence and integrity earning them the Bomanite Exposed Aggregate Project Over 6,000 Sq. ft Silver Award. With their outstanding workmanship they have been asked to continue with Phase III of the Valley Children's Healthcare Landscape Master Plan, providing additional beautiful Bomanite Decorative Concrete.
