

## Bomanite Custom Polishing Systems

### PROJECT PROFILE

NISHIMINE DENTAL OFFICE

### PROJECT INFORMATION

The Nishimine Dental Office located in Fresno, CA wanted to renovate their office to make it more modern and comfortable for patients and employees. They met with the project designer Suzanne Byrnes of Facility Designs for the overall look. After visiting with the local Bomanite Licensed Contractor, [Heritage Bomanite](#), the flooring that was chosen was the Bomanite Custom Polishing System VitraFlor. Polished concrete met the criteria for the overhaul for its functionality and style; even gray concrete can be stunning!

[Bomanite VitraFlor](#) utilizes select un-colored concrete that is placed and finished to standards required for decorative polished concrete flooring. The concrete is ground to expose the desired amount of aggregate, then polished to the required gloss level and treated with a Bomanite stain resist. The primary benefit to Bomanite VitraFlor is the simplicity of installation and durability of the finished floor, lending to its low-maintenance and long-term sustainable features.

Bomanite VitraFlor is the most cost effective of all the Bomanite Custom Polishing systems. Heritage Bomanite installed approximately 1,000 square feet of the VitraFlor system, polishing up to 3,000 grit and finishing with the Bomanite VitraFinish floor sealer. The dental offices, hallways and conference room were all given the polished treatment for that extra durability and modern vibe.
