

Bomanite Exposed Aggregate

PROJECT PROFILE

SPANG RESIDENTIAL POOL DECK (SRA)

PROJECT INFORMATION

Your backyard is an extension of your home, an outdoor living space offering a bonus room that brings lounge worthy seating, entertainment elements and cooking and dining into the fresh air. A retreat for outdoor enjoyment, intimate gatherings, appreciating the company of good friends and family while providing a place to refresh, re energize and relax were the intentions of the homeowner's wishes. With attention to details and creating partnerships with clients, architects, designers and tradespeople, [Hendel Homes](#), an award winning Luxury Home Builder, focuses on taking a more personal approach by building strong relationships with clients so that all of their needs are identified and applied during construction. They instill a hands-on approach to delivering diverse designs and style along with distinctive architectural features, with careful project planning, selection of materials and follow through that create comfortable environments and lasting memories.

The homeowners sought an open-air environment that worked with their newly built modern Tudor Home by Hendel and that would provide them with areas for all to experience throughout the seasons. Hendel Homes started with a screened in porch that contained a fireplace coffee table to provide a mix of indoor/outdoor modern ambiance. The porch has an imprinted concrete floor that extends down concrete steps to a pool deck that encompasses a unique textural concrete exposed finish. The decking is simple sophistication at it's best. An area for relaxing and taking in the sun, an outdoor kitchen with modern architectural details and outdoor dining space are all the essentials required to create an inspiring impactful design that meets the homeowner's criteria.

Originality, Low-Maintenance and Safety were the core features when meeting with the Pool Builder, [Atlantis Pools](#). Hendel Homes knew they were in good hands as they have a continuing relationship with Atlantis as well as Bomanite Licensee, [Concrete Arts, Inc.](#) After reviewing with the client several amazing pool designs that would fit with the homeowners needs and design, samples of the decking material were requested by Hendel from Concrete Arts, Inc. Established in 1994, with a passion and dedication to innovative concrete applications, Concrete Arts, Inc. was the optimal selection for providing exceptional service and creative design to the project. They provided several concrete samples that showcased details of texture and color options complementary to the exterior grounds for fluid indoor/outdoor living and entertainment. The [Bomanite Exposed Aggregate System](#) Sandscape Refined Antico was hands down the ultimate chosen decorative concrete high-end finish with a cost-effective benefit.

[Bomanite Sandscape Refined](#) is an architectural exposed concrete with a very fine exposure depth. Add the [Antico process](#) into the surface and you now have created fissures, voids and other random effects not normally seen with traditional finished concrete that is comparable to the look of natural travertine or manufactured cast stone. Sandscape Refined Antico is a unique aesthetically pleasing alternative system for pool decks or anywhere that improved wear resistance for light- to moderate-duty vehicular or foot traffic is required. [Sandscape Refined Antico](#) provides long term durability, low maintenance and high safety features for homeowners who desire the appeal of a slip resistant surface with an original decorative concrete finish.

[Concrete Arts, Inc.](#) earned the 2019 Bomanite Exposed Aggregate Project Over 6,000 Sq. Ft – Honorable Mention Award for their expert installment of the Bomanite Decorative Concrete Finish ensuring that design meets function.
