

PROJECT PROFILE

YALE PEABODY MUSEUM

PROJECT INFORMATION

Using Bomanite SandScape® Texture deep exposure, which is part of the Bomanite Exposed Aggregate Systems, Connecticut Bomanite installed 5871 SF of custom blend exposed aggregate for the walkway around the exterior of the Yale Peabody Museum. The museum is located on the Yale University campus in New Haven Connecticut. Bomanite Exposed Aggregate Systems allow for a variety of mixed designs to make sure any aesthetic can be achieved. With new technology and innovation, The Bomanite Company has given a new and more durable look to the aged decorative concrete technique. The Bomanite Exposed Aggregate Systems provides cost-effective and long-lasting decorative concrete to fit any client's needs.
