

Bomanite®

Your Single Source For Innovative Architectural Concrete Solutions

PATTERNS

FISHSCALE COBBLESTONE

The Bomanite Fishscale Cobblestone pattern gives that worldly feel of walking down those ancient cobblestone european streets. Bomanite is the name associated with the original cast-in-place, colored and imprinted architectural concrete paving. The Fishscale Cobblestone tool provides an imprinted pattern that has a smooth surface between the joint lines. The imprinting tools produce patterns in the surface of the concrete in much the same way as a cookie cutter cuts patterns in cookie dough and simulates most smooth tiles, new brick and certain stone materials.

Bomanite adds a unique statement of style and personality to virtually any surface, perfect for both indoor and out. Fishscale, a unique pattern from the Bomanite Imprint Systems collection, provides a distinctive fan design that is versatile enough to complement a wide variety of architectural styles.

Only Bomanite architectural concrete provides the beauty of natural stone with the durability and affordability of concrete. With more than 200 creative patterns and an endless palette of colors, Bomanite offers an unmatched range of innovative design options to turn ordinary concrete into something extraordinary.

Realize the possibilities with Bomanite Imprint Systems.

The Bomanite product line is installed only through the licensed Bomanite network, and exclusively by specially trained and highly skilled Licensed Contractors.
