## **Engineered Strength and Beauty**

Modena by Bomanite transforms existing or worn surfaces into beautiful walkways, showrooms and lobbies. This engineered interior cementitious topping is blended with selected aggregates, ground and polished to the desired gloss level. Available in a range of colors and patterns using decorative strips, sawcuts, topically applied stains, variety of aggregates are all options in creating a beautifully designed and functional floor. The Modena system is a low-cost alternative for renovation projects and provides the durability and strength for this exceptionally long lifespan system. With the industry's lowest lifecycle costs, low to zero VOC and minimal maintenance requirements, Modena by Bomanite is the optimal choice for renewed surfaces.

## CUSTOM POLISHING SYSTEMS

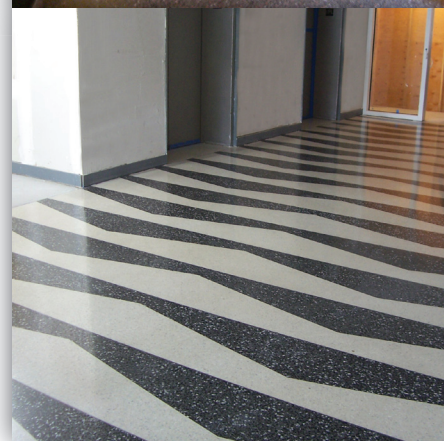

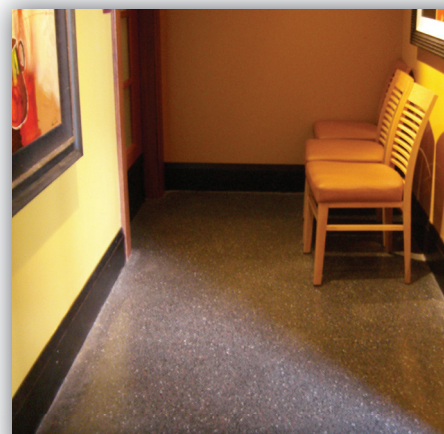

**MODENA by BOMANITE**

## REALIZE The Possibilities.

### *Durability with Style*

The Modena system utilizes one of three proprietary, engineered cementitious toppings that are bonded to the surface of cured or plastic concrete or correctly prepared wood substrates; Modena SL, Modena TG and Modena Monolithic. All three systems can have cove base and stair components that are generally pre-cast and finished to match. Once cured the Modena topping system is ground to expose the desired amounts of aggregate, then polished to the required gloss level and treated with a Bomanite stain resist. The primary benefits to Modena by Bomanite are the range of colors available, the aggregate characteristics, the excellent durability of color and the ability to transform ordinary concrete into highly decorative flooring.

### *A Variety of Aggregates and Color Options Equal a High-End Design*

The various Modena products are engineered to work with a range of aggregates such as granite, glass, marble, porcelain, etc. from 1/8" and up in size. Unlike comparable terrazzo flooring, Modena by Bomanite is designed specifically to be polished with a fine aggregate gradation similar to that of concrete. Modena by Bomanite is integrally colored and/or stained in a wide range of options and may be seeded with additional aggregate or even hard troweled and paste polished.

### *Insist on only the best. Insist on Bomanite Custom Polishing Systems.*

When you choose a Bomanite Custom Polishing System rest assured that the application will be handled by a highly skilled and specially trained licensed Bomanite Contractor who will work with you to create unsurpassed, high-quality concrete flooring systems.
