EXPOSED AGGREGATE SYSTEMS

BOMANITE ARCHITECTURAL CONCRETE NEWS : VOLUME 20.01

Bomanite Exposed Aggregate Systems bring the vintage decorative concrete option back into the forefront of the industry with innovative systems, longer-lasting products, and a variety of mix designs that combine the durability you need with the beauty you desire. With a variety of modernized mixes and an unlimited palette of colors, textures and aggregate options to choose from, Bomanite Exposed Aggregate Systems offer cost-effective solutions that are more durable than ever and reveal just how brilliant concrete can be.

THE LATEST NEWS FROM OUR BOMANITE NETWORK OF CONCRETE CRAFTSMEN

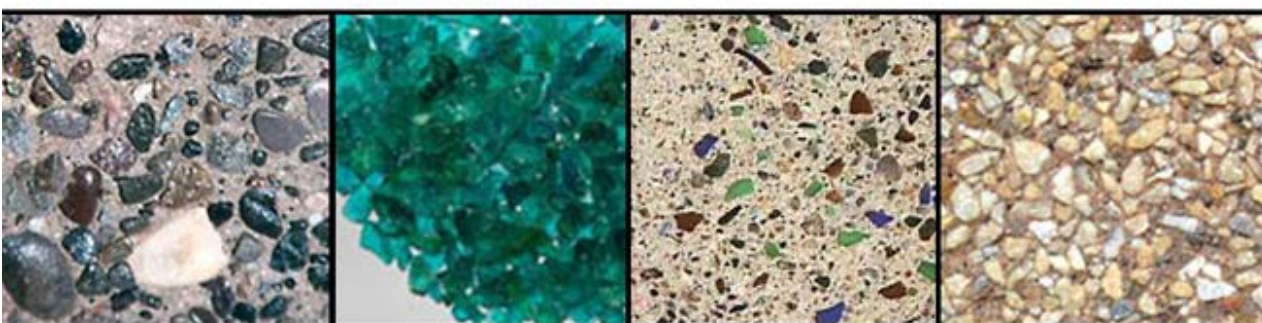

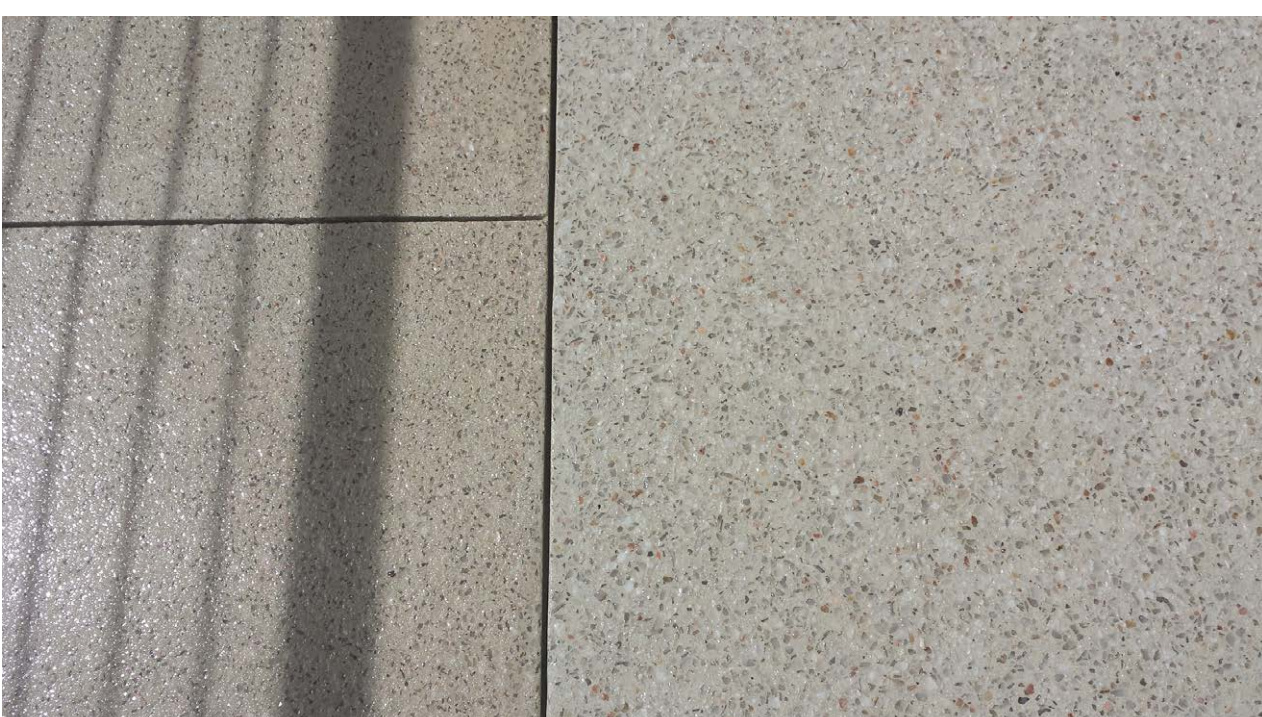

FEATURED PROJECT: WESTCHESTER COUNTRY CLUB - BEACH CLUB

The Westchester Country Club is an exclusive family-oriented Club located in Rye, New York which is a short distance from Manhattan. **The Westchester Country Club** has been ranked 12th of 4,000 private Clubs in the United States and maintains its status as a "Platinum Club." Among the amenities is the 62-acre Beach Club with a notable aquatics area. The Beach Club also features five separate food and beverage facilities. The Main Bar is centrally located and the hub of social activity at the Beach.

Bomanite Licensee, **Beyond Concrete** located out of Keyport, NJ worked with the GC and **Architect Kenneth R. Nadler, Consulting LLC** to provide a product to withstand the exterior elements of the weather. After reviewing several architectural concrete samples of different Bomanite systems and products, the **Bomanite Revealed Exposed Aggregate System** was chosen for its excellence in durability and ability to withstand freezing temperatures, sea salt, sand, pouring rain and plenty of sunshine...[READ MORE](#).

DID YOU KNOW...THERE IS NO LIMIT TO WHAT TYPE OF AGGREGATE YOU CAN USE?

There is no limit to what type of aggregate you can use...provided it is qualified first for the desired application. Crushed aggregates are rough on bare feet and tend to have more variation in size than round. When using crushed it is recommended to keep the aggregate size small for pool decks and patios where bare feet are expected. Most round aggregates are river sourced either from dredging or quarrying river deposits. Most standard exposed mixes are gap graded with little to no intermediate sized aggregates so as to provide the most consistent or clean look. And in some cases the same aggregate as in the mix is lightly seeded on top during placement to improve the density or appearance of the finish.
