

Bomanite®

Your Single Source For Innovative
Architectural Concrete Solutions

PATTERNS

CHIPPED SHALE

The Bomanite Chipped Shale Texture is unique and based on a hand chipped soft stone. The Chipped Shale Texture is coarse with substantial depth of relief. It is appropriate for areas where a large degree of variation is desired such as a riverbed pattern, shallow streambed, water feature or rocky desert pathway. The Chip Shale Texture Tool is available in 18" x 18" size with varying sizes up to 48" x 48" to accommodate many applications.

Bomanite adds a unique statement of style and personality to virtually any exterior surface. Chipped Shale, a unique texture from the Bomanite Imprint Systems collection, provides a distinctive design that can be used for themed environments.
