

REALIZE THE POSSIBILITIES...

Bomanite® IMPRINT SYSTEMS

BOMANITE ARCHITECTURAL CONCRETE NEWS : VOLUME 20.05

Bomanite Imprint Systems are cast-in-place concrete flooring & paving that adds a distinctive architectural touch to any project, together with the durability to stand up to the toughest traffic loads and environmental conditions. For over six decades, Bomanite Imprint Systems have offered homeowners and design professionals a virtually limitless palette of colors, textures, and patterns - at a fraction of the cost of traditional materials. Choose from many natural textures including slate, granite, limestone, sandstone, cobblestone and used brick. When you specify architectural concrete, accept no substitutes.

THE LATEST NEWS

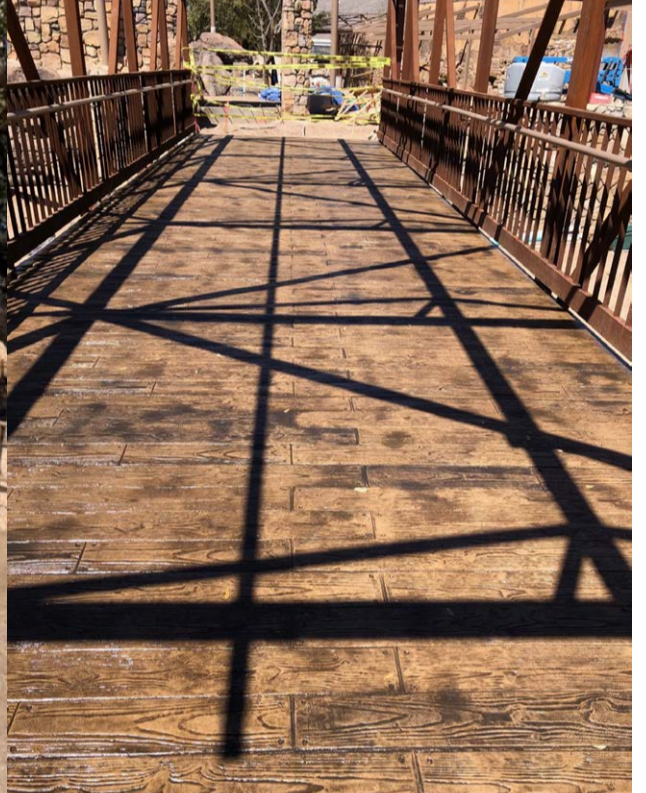

"The El Paso Zoo celebrates the value of animals and natural resources and creates opportunities for people to rediscover their connection to nature."

The El Paso Zoo is a 35-acre facility that houses animals representing over 220 species, including critically endangered species. Accredited by the Association of Zoos & Aquariums (AZA), the El Paso Zoo celebrates the value of animals and natural resources and creates opportunities for people to rediscover their connection to nature.

The Chihuahuan Desert Exhibit showcases North America's most diverse desert that encompasses the El Paso and Northern Mexico regions. The exhibit tells the story of the Chihuahuan Desert giving visitors the opportunity to experience not only the land, but the animals that surround them every day such as peccaries, wild turkeys, jack rabbits and includes key mammals such as Mexican grey wolves, mountain lions, and jaguars; birds including sand hill cranes, and barn owls; reptiles such as the bolson tortoise and coach whip snake; and arachnids such as scorpions, tarantulas, and black widow spiders.... ARCHITECTURAL SAMPLES UNLIMITED CONCRETE COLORS

Bomanite provides a wide range of architectural concrete colorants to enhance your current space, renovated or newly designed areas. Color can be added to concrete by several methods: added into the mix (integrally colored), dusted on the surface (dry shake), and hand applied with brushes, trowels, sprayers as liquids or powder forms (stains, dyes, tints, toppings). With each project, it is strongly recommended that hard samples be created, viewed and approved using construction techniques and materials identical to those that will be used in the actual construction of the project. This sampling process must be completed prior to specifying the final color and appearance.

Bomanite offers a chip samples to specifiers, architects, designers, landscape designers and anyone interested in a hard sample of a color. Samples help determine the look and finish of the selected Bomanite System. Color samples are available in 3" x 3" chips in boxed sets or individual colors. Custom samples can be made and are available in 6" x 6", 12" x 12" or 24" x 24". If interested in obtaining a sample for your project, contact your local Bomanite Licensed Contractor. They can assist with sample selection, project design, specifications and color charts.
