

REALIZE THE POSSIBILITIES...

Bomanite® IMPRINT SYSTEMS

BOMANITE ARCHITECTURAL CONCRETE NEWS : VOLUME 20.12

Bomanite Imprint Systems are cast-in-place concrete flooring & paving that adds a distinctive architectural touch to any project, together with the durability to stand up to the toughest traffic loads and environmental conditions. For over six decades, Bomanite Imprint Systems have offered homeowners and design professionals a virtually limitless palette of colors, textures, and patterns - at a fraction of the cost of traditional materials. Choose from many natural textures including slate, granite, limestone, sandstone, cobblestone and used brick. When you specify architectural concrete, accept no substitutes.

THE LATEST NEWS

Universal Accessible Inspiration Playground Uses Bomanite Imprint Systems Boardwalk Pattern for Bridge Design Element

The expansion and redesign of [Bellevue's Downtown Park](#) was a long-time vision for civic leaders that has finally come to completion. Bomanite Licensee, [Belarde Company](#) installed a variety of stairs, sidewalks, and plazas throughout the 21-acre site as well as a key Bomanite architectural concrete feature in the newly designed Inspiration Playground.

The Bellevue Rotary Club was instrumental in helping to expand the original playground in the Downtown Park to include an innovative play space where kids of all ages and abilities can play and explore at their own pace. With the Design of Carol Henry from [Design Concepts](#), the park is dedicated to fun, imagination and learning, and presents a universally accessible play experience that creates an overall truly Inspiration(al) playground. The new playground offers interactive features that engage the senses, create inclusiveness and accommodate children of all abilities and their caregivers.....

ARCHITECTURAL SAMPLES UNLIMITED CONCRETE COLORS

Bomanite provides a wide range of architectural concrete colorants to enhance your current space, renovated or newly designed areas. Color can be added to concrete by several methods: added into the mix (integrally colored), dusted on the surface (dry shake), and hand applied with brushes, trowels, sprayers as liquids or powder forms (stains, dyes, tints, toppings). With each project, it is strongly recommended that hard samples be created, viewed and approved using construction techniques and materials identical to those that will be used in the actual construction of the project. This sampling process must be completed prior to specifying the final color and appearance.

Bomanite offers chip samples to specifiers, architects, designers, landscape designers and anyone interested in a hard sample of a color. Samples help determine the look and finish of the selected Bomanite System. Color samples are available in 3" x 3" chips in boxed sets or individual colors. Custom samples can be made and are available in 6" x 6", 12" x 12" or 24" x 24". If interested in obtaining a sample for your project, contact your local Bomanite Licensed Contractor. They can assist with sample selection, project design, specifications and color charts.
