POLISHING
SYSTEMS

MODENA SL

Imagine

Engineered Strength and Beauty

Bomanite Modena SL transforms existing or worn surfaces into beautifully functional floors. Colored with permanent iron oxide pigments and blended with select aggregates, Bomanite Modena SL is a value conscious alternative for renovation projects while providing a highly durable, low lifecycle cost floor. With zero VOC's, no Portland cement, and minimal maintenance requirements, Bomanite Modena SL is the optimal choice for environmentally sensitive projects.

CUSTOM POLISHING SYSTEMS

MODENA SL

REALIZE The Possibilities.

Durability with Style

Bomanite Modena SL is an engineered self-leveling cementitious topping that is bonded to the surface of cured concrete or correctly prepared wood substrate, with cove base and stair components generally pre-cast and finished to match. Once cured, the Bomanite Modena SL topping is ground to expose the aggregates contained within, then polished to the required gloss level and treated with a Bomanite stain resistant sealer or coating. The primary benefits to Bomanite Modena SL are the range of colors available, the speed of installation, the excellent durability, and the ability to create a predictable and relatively uniform surface appearance, making it perfect for high traffic public access buildings such as airports, hospitals, government buildings, and schools.

A Variety of Aggregates and Color Options Equal a High-End Design

The various Bomanite Modena SL products are engineered to work with a range of aggregates such as granite, glass, marble, porcelain, etc. that typically range from 1/16" through 1/8" in size. Unlike comparable terrazzo flooring, Bomanite Modena SL is designed specifically to be polished with a fine aggregate gradation like that of concrete. Bomanite Modena SL is integrally colored and/or dyed in a wide range of options and may be seeded with additional aggregate.

Insist on only the best. Insist on Bomanite Custom Polishing Systems.

When you choose a Bomanite Custom Polishing System rest assured that the application will be handled by a highly skilled and specially trained licensed Bomanite Contractor who will work with you to create unsurpassed, high-quality concrete flooring systems.
