SYSTEMS**

**MODENA TG**

# Imagine

## Engineered Strength and Beauty

Bomanite Modena TG transforms existing or worn surfaces into beautifully functional floors. Colored with permanent iron oxide pigments and blended with select aggregates, Bomanite Modena TG is a highly decorative terrazzo like flooring designed for projects requiring a highly durable, low lifecycle cost floor. With zero VOC's, minimal Portland cement combined with recycled pozzolanic additives, and reduced maintenance requirements, Bomanite Modena TG is an excellent choice for environmentally sensitive projects.

## CUSTOM POLISHING SYSTEMS

### MODENA TG

## REALIZE The Possibilities.

### Durability with Style

Bomanite Modena TG is an engineered mortar type cementitious topping that is bonded to the surface of cured concrete or correctly prepared wood substrate, with cove base and stair components either cast in place or pre-cast and finished to match. Once cured, the Bomanite Modena TG topping is ground to expose the aggregates contained within, then polished to the required gloss level and treated with a Bomanite stain resistant sealer or coating. The primary benefits to Bomanite Modena TG are the range of colors available, the variety and size of decorative aggregates, the excellent durability, and the ability to create a predictable and relatively uniform surface appearance, making it perfect for high traffic public access buildings such as airports, hospitals, government buildings, and schools.

### A Variety of Aggregates and Color Options Equal a High-End Design

The various Bomanite Modena TG products are engineered to work with a range of aggregates such as granite, glass, marble, porcelain, etc. typically ranging from 1/8" through 5/8" in size. Unlike comparable terrazzo flooring, Bomanite Modena TG is designed specifically to be polished with a fine aggregate gradation like that of concrete. Bomanite Modena TG is integrally colored and may be seeded with additional aggregate.

### Insist on only the best. Insist on Bomanite Custom Polishing Systems.

When you choose a Bomanite Custom Polishing System rest assured that the application will be handled by a highly skilled and specially trained licensed Bomanite Contractor who will work with you to create unsurpassed, high-quality concrete flooring systems.

Your Authorized Bomanite  
Custom Polishing Licensed Contractor is:
