Shale Gray

Natural Gray

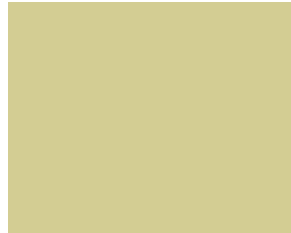

Dark Gray

Corn Husk

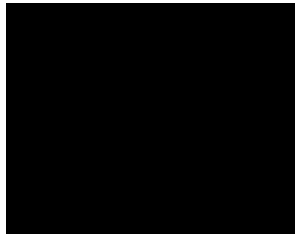

Colorado Buff

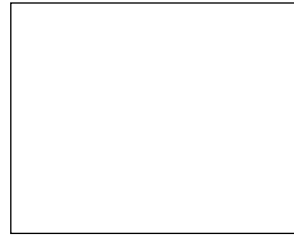

Birch Bark

Beige

Black

White

Bold Red

Autumn Brown

Safety Yellow

Safety Red

Parisian Blue

Sheffield Green

IMPORTANT NOTES:

Colored Florspartic 100 is available only as high gloss. All Solid Color Systems incorporate a clear topcoat of Florspartic 100 which is available in both a high gloss and semi-gloss finish.

For additional color options reference the Bomanite Coloration Systems Standard Color Chart or select the desired color from a Pantone Guide or equal. Non-standard colors require additional time to produce due to the procedure required to tint the resin component.

Un-colored Florspartic 100 is a water-clear product that can be used as a rapid curing topcoat for Bomanite Concrete Dyes and Bomanite Stains. Reference the Bomanite Patene Arctectura Color Chart for available stain colors.

It is strongly recommended that samples be created, viewed and approved using construction techniques and materials identical to those that will be used in the actual construction of the project. This sampling process must be completed prior to specifying the final color and appearance. Colors shown approximate as closely as possible the appearance of selected product, however online screen colors and printed charts should only be used for ideas as these colors do not represent final results.
